

KARRI JOSHI SAI GOVIND

+91-8500710061 — karrijoshisaigovind@gmail.com — LinkedIn — Github

SUMMARY

Aspiring **Data Analyst** pursuing a B.Tech in **Computer Science and Data Science** with hands-on experience in **Python, SQL, ETL Pipelines**, and **Data Analytics**. Skilled in **data cleaning, data transformation, exploratory data analysis**, and workflow automation using **Apache Airflow**. Experienced in developing analytical solutions, generating actionable insights, and building data-driven applications. Strong foundation in **Data Visualization, Machine Learning**, and problem-solving with a passion for leveraging data to support business decision-making.

EDUCATION

Anil Neerukonda Institute of Technology and Sciences	2022 – 2026
B.Tech in Computer Science and Data Science	CGPA: 8.00
Cipra Junior College	2020 – 2022
Intermediate (MPC)	Percentage: 62.6%
Sri Chaitanya School	2019 – 2020
SSC	Percentage: 98%

EXPERIENCE

Infosys Springboard	Nov 2025 – Feb 2026
<i>Python Data Intern – ETL Pipelines & Workflow Automation</i>	
- Developed and scheduled ETL pipelines using Apache Airflow DAGs. - Performed data extraction, cleaning, and transformation across multiple datasets. - Automated workflow scheduling and monitoring for improved operational efficiency. - Utilized Python for preprocessing, validation, and analytical tasks. - Containerized applications using Docker. - Applied Machine Learning techniques to analyze data and generate insights.	

PROJECTS

Sales Performance Analysis Dashboard	<i>Python, SQL, Pandas, Matplotlib</i>
- Analyzed sales datasets using Python, SQL, and Pandas. - Performed data cleaning and exploratory data analysis (EDA). - Identified trends in product performance, customer behavior, and regional sales. - Created visual reports using Matplotlib to support business decisions.	
Customer Churn Analysis	<i>Python, SQL, Machine Learning</i>
- Conducted EDA to identify factors influencing customer attrition. - Utilized SQL and Python for data preparation and feature engineering. - Built predictive models to estimate customer churn probability. - Generated insights to improve customer retention strategies.	
PDF Document Structure Extraction	<i>Python, PdfPlumber, JSON</i>
- Extracted structured information from PDF documents using Python and PdfPlumber. - Converted unstructured content into machine-readable JSON. - Implemented automated heading and section detection using heuristic algorithms. - Improved document accessibility and downstream processing efficiency.	

TECHNICAL SKILLS

Programming Languages: Python, SQL
Libraries: Pandas, NumPy, Matplotlib, Scikit-learn
Database: MySQL
Data Engineering: Apache Airflow, ETL Pipelines
Tools: Excel, PowerBI, Docker, Git, GitHub, VS Code
Core Concepts: Data Analysis, Data Cleaning, Data Transformation, Data Visualization, EDA, Machine Learning, Workflow Automation

CERTIFICATIONS

- Python for Data Science – IBM Cognitive Class
- Internet of Things – NPTEL
