SUMMARY

Recent B.Tech graduate in Computer Science and Data Science with hands-on experience in Python, SQL, ETL pipelines, backend development, and data analysis. Skilled in developing RESTful APIs, automating data workflows, cleaning and validating datasets, and designing relational databases through internships and academic projects. Strong analytical and problem-solving abilities with an interest in Backend Development, Data Engineering, Data Analytics, and Business Operations.

TECHNICAL SKILLS

Programming Languages:	Python, SQL, JavaScript, HTML, CSS
Libraries & Frameworks:	FastAPI, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
Databases:	MySQL
Tools:	Git, GitHub, Apache Airflow, Docker, VS Code
Core Concepts:	Data Structures, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering, Machine Learning, ETL Pipelines, REST APIs

EXPERIENCE

Infosys Springboard <i>Python Intern – ETL Pipelines & Workflow Automation</i>	Nov 2025 – Feb 2026
- Built and automated ETL pipelines using Python and Apache Airflow for efficient data processing workflows. - Developed and scheduled Airflow DAGs to automate workflow execution and task dependencies. - Cleaned, transformed, and validated datasets to improve data quality for reporting and analytics. - Containerized ETL services using Docker to ensure consistent deployment across development environments. - Collaborated on workflow automation to improve operational efficiency and pipeline reliability.	
EduMoon <i>Web Development Intern</i>	May 2024 – Jun 2024
- Designed and developed a full-stack recipe sharing platform with user authentication. - Built RESTful APIs supporting CRUD operations for recipe management. - Designed a normalized SQL database for users, recipes, ingredients, and tags. - Applied object-oriented programming principles to build a modular backend architecture.	

PROJECTS

PDF Document Structure Extraction	Python, PdfPlumber
- Converted unstructured PDF documents into structured JSON data. - Automated document extraction workflows, reducing manual processing effort. - Designed rule-based extraction logic to process complex document layouts accurately.	
IoT Malware Detection System (Final Year Project)	Python, FastAPI, MalConv
- Developed a malware detection system achieving 95% classification accuracy on benchmark datasets. - Classified executable file features into multiple malware families. - Built RESTful APIs using FastAPI for real-time malware prediction. - Performed exploratory data analysis and visualization using Matplotlib.	
Sales Performance Analysis Dashboard	Python, SQL, Pandas, Matplotlib
- Cleaned and analyzed sales datasets using Python and SQL. - Performed exploratory data analysis to identify sales trends and customer patterns. - Built visual dashboards using Matplotlib for business reporting.	
Customer Churn Analysis	Python, SQL, Machine Learning
- Performed exploratory data analysis on customer behavior. - Prepared datasets using SQL and Python for predictive modeling. - Built machine learning models to estimate customer churn. - Generated analytical insights to support customer retention strategies.	

EDUCATION

Anil Neerukonda Inst. of Technology & Sciences	B.Tech CS & Data Science	2022 – 2026	GPA: 8.00
Cipra Junior College	Intermediate (MPC)	2020 – 2022	62.6%
Sri Chaitanya School	Secondary School (SSC)	2019 – 2020	98%

CERTIFICATIONS

- Python for Data Science – IBM Cognitive Class
- Internet of Things (NPTEL)
- Data Science – Main Flow Services and Technologies Pvt. Ltd.
- Full Stack Web Development – EduMoon
- Foundations of Prompt Engineering – Amazon AWS Skill Builder
